Welcome to your CDP Climate Change Questionnaire 2022

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

About Aegon

Aegon is an integrated, diversified, international financial services group. We offer investment, protection, and retirement solutions, always with a clear purpose: Helping people live their best lives. This commitment requires a sustainable, future-oriented business that actively considers all stakeholders, including our customers, employees, investors, partners, and society at large. Our roots date back almost 180 years to the first half of the 19th century. Our strategy is focused on three core markets (the United States, the United Kingdom, and the Netherlands), three growth markets (Spain & Portugal, Brazil, and China), and one global asset manager. Aegon is headquartered in The Hague, the Netherlands.

Business overview:

Aegon allocates capital toward profitable opportunities in its core and growth markets, and through Aegon Asset Management. As an international financial services group, we share capital, talent, knowledge, processes, and technologies across our different businesses. We derive our revenues and earnings from insurance premiums, investment returns, fees, and commissions. We offer both direct and intermediary-assisted access to our products and services. For more complex and advanced services and products requiring tailored advice, we rely on a broad network of business partners that includes brokers, agents, banks, employee benefits consultants, and independent financial advisors. For simpler types of solutions, we are growing our direct distribution capabilities to engage with customers directly.

Aegon’s core markets

In the United States, Aegon operates primarily under the Transamerica brand. Through employers, Transamerica’s Workplace Solutions division offers retirement plans, individual retirement accounts, voluntary employee benefits, and stable value solutions. Its Individual Solutions division offers life insurance, annuities, and mutual funds through third-party broker-dealers, banks, wire houses, independent financial planners, and agents. These products are also distributed through its affiliated retail distribution group. In the Netherlands, Aegon mainly
operates under the Aegon brand. Aegon the Netherlands focuses on life insurance, long-term savings, and pension and annuity solutions. The Workplace Solutions business focuses on new-style defined contribution pension solutions, associated disability services, and pensions administration. The company also operates a large mortgage origination business. Under the Knab brand, Aegon provides digital banking solutions with a focus on retail and self-employed customers. In the United Kingdom, Aegon provides solutions for retirement, workplace savings, investing, and protection, all under the Aegon brand. Aegon UK accesses customers through wealth advisors as well as the workplace, and holds leading positions in the retirement and savings markets in both the workplace and retail segments.

**Aegon’s growth markets**

In China, Aegon participates in two different joint ventures, each with its own brand and market presence. Aegon owns a 49% stake in Aegon THTF Life Insurance Company, which offers life insurance solutions through a network of branches, primarily in eastern China, and develops multi-channel distribution capabilities. Aegon Asset Management owns 49% of Aegon-Industrial Fund Management Company, a Shanghai-based asset manager that offers mutual funds, segregated accounts, and advisory services. In Brazil, Aegon has a 55% interest in Mongeral Aegon Group (MAG Seguros), the country’s thirdlargest independent life insurer. MAG Seguros offers individual protection solutions, ranging from life insurance and pension products to solutions in investments, pension funds, and pension management. Together with Banco Cooperativo do Brasil (Bancoob), MAG Seguros also operates a joint venture company dedicated to providing life insurance and pension products within the Sicoob, Brazil’s largest cooperative financial system. In Spain & Portugal, Aegon has operated under the Aegon brand since 1980. In 2013, Aegon entered a strategic partnership with a 51% stake in a joint venture with Banco Santander to distribute life, health, and non-life insurance products through the bank’s network of branches. Distribution agreements are also in place with Liberbank. Aegon Spain’s own distribution channel offers life insurance, health insurance, and pension products.

**One global asset manager**

Aegon Asset Management is an active global investment business that manages and advises on assets of EUR 410 billion for a global client base consisting of pension plans, public funds, insurance companies (including Aegon’s subsidiaries), banks, wealth managers, family offices, and foundations. Aegon Asset Management is active in our core and growth markets, as well as in France, Germany, Hungary, and Japan.

Further information on our businesses can be found in the business overview section at page 302 Aegon Integrated Annual Report 2021.

### C0.2

**(C0.2) State the start and end date of the year for which you are reporting data.**

C0.8

(C0.8) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?
Indicate whether you are able to provide a unique identifier for your organization | Provide your unique identifier
---|---
Yes, an ISIN code | NL0000303709

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

Yes

C1.1a

(C1.1a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for climate-related issues.

<table>
<thead>
<tr>
<th>Position of individual(s)</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chief Executive Officer (CEO)</td>
<td>Aegon’s Executive Board is charged with the overall management of the Company and is therefore responsible for developing and executing Aegon’s strategy. Additionally, it is responsible for managing the Company’s risk profile and overseeing any relevant sustainability issues. Each member has duties related to his or her specific area of expertise. For example, the CEO of Transamerica (and member of Aegon’s Management Board) chairs the Global Sustainability Board (GSB) which oversees Aegon’s sustainability approach.</td>
</tr>
<tr>
<td>Chief Risk Officer (CRO)</td>
<td>With regards to Aegon’s Enterprise Risk Management Framework (ERMF), climate oversight is provided by the Group Risk &amp; Capital Committee (GRCC), which oversees the Financial Risk function’s climate scenarios that analyze the potential climate impacts on our accounts. There is also the Non-Financial Risk Committee (NFRC) which oversees the Operational Risk function’s annual climate risk assessment that identifies possible physical and transition risks that could impact Aegon. Both committees are co-chaired by the CRO.</td>
</tr>
<tr>
<td>Other C-Suite Officer</td>
<td>Aegon’s sustainability approach is overseen by the Global Sustainability Board (GSB), chaired by the CEO of Transamerica (who is also a member of Aegon’s Management Board). The GSB is a senior management committee established in December 2021, replacing the former Responsible Business &amp; Investment Committee (RBIC), to enhance overall governance and oversight of our company-wide approach to sustainability. The GSB meets quarterly and advises the Management and Executive Boards on Aegon’s strategic sustainability agenda, including two priority themes: climate change and inclusion &amp; diversity.</td>
</tr>

</table>
sustainability. The GSB meets quarterly and advises the Management and Executive Boards on Aegon’s strategic sustainability agenda, including two priority themes: climate change and inclusion & diversity. It is chaired by the CEO of Transamerica (who is also a member of Aegon’s Management Board) and consists of senior-level representatives from across the company.

The GSB is supported in its mission by local sustainability boards that translate the global sustainability agenda into actions within local business units and provide market-relevant feedback. With respect to climate change, the GSB is also supported by the Net-Zero Working Group (NZWG). The NZWG is tasked with undertaking the required analysis and coordination of actions on Aegon’s General Account investments in support of our 2050 net-zero commitment and obligations under the Net-Zero Asset Owner Alliance. It draws on staff-level representation from across the company to generate insight and recommendations for the GSB on potential management actions.

| Board-level committee | The Aegon Supervisory Board's 'Nomination and Governance Committee' has ultimate oversight of Aegon’s sustainability approach as managed by the Management and Executive Board-level Global Sustainability Board (GSB). |

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

We do not have a fixed or quantified definition of substantive financial or strategic impact on our business. Aligned with IFRS and SII practices we do consider that information should be considered material if that information could influence the decision-making or judgment of the intended users of that information. Aegon, as many companies and audit firms, consider 5% per metric as a rule of thumb for materiality.

C2.2

(C2.2) Describe your process(es) for identifying, assessing and responding to climate-related risks and opportunities.

Value chain stage(s) covered
- Direct operations
- Upstream
- Downstream

Risk management process
- Integrated into multi-disciplinary company-wide risk management process

Frequency of assessment
- Annually

Time horizon(s) covered
- Short-term
- Medium-term
- Long-term

Description of process
Climate-related risks links to our defined risk universe and risk types for which risk appetite, risk limits and risk policies are set. Furthermore, relevant developments related to climate change (e.g. regulations) are tracked to assess their potential impacts and required responses. Governance around risk appetite, risk limits and risk policies include the Global Risk and Capital Committee (GRCC) and its subcommittees NFRC (non-financial risks) and ERMAAC (financial risks).

### C2.2a (C2.2a) Which risk types are considered in your organization’s climate-related risk assessments?

<table>
<thead>
<tr>
<th>Category</th>
<th>Relevance &amp; inclusion</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current regulation</td>
<td>Relevant, always included</td>
<td>We face risk from significant government action or U-turns in public policy.</td>
</tr>
<tr>
<td>Emerging regulation</td>
<td>Relevant, always included</td>
<td>We face risk from significant government action or U-turns in public policy.</td>
</tr>
<tr>
<td>Technology</td>
<td>Relevant, always included</td>
<td>We continue to investigate the market for clean energy investments and want to contribute to making these projects investable.</td>
</tr>
<tr>
<td>Legal</td>
<td>Relevant, always included</td>
<td>We face risk from litigation (and associated financial implications) and reputational damage following from not fully considering or responding to the impacts of climate change, or not providing appropriate disclosure of current and future risks. The risks can relate both to Aegon and the companies in which it invests.</td>
</tr>
<tr>
<td>Market</td>
<td>Relevant, always included</td>
<td>Governments may decide to severely restrict certain industries or energy uses in response to natural catastrophes. This risk carries considerable financial impact. We are currently working on more sophisticated assessments and continue to monitor investment risk as it emerges and ensure our investment professionals have the knowledge and ability to address them.</td>
</tr>
<tr>
<td>Reputation</td>
<td>Relevant, always included</td>
<td>Reputational risks are identified as most likely to emerge, though with modest financial impact.</td>
</tr>
<tr>
<td>Acute physical</td>
<td>Relevant, always included</td>
<td>Underwriting and physical damage could result in financial risk for our insurance business.</td>
</tr>
<tr>
<td>Chronic physical</td>
<td>Relevant, always included</td>
<td>Underwriting and physical damage could result in financial risk for our insurance business.</td>
</tr>
</tbody>
</table>
### C-FS2.2b

(C-FS2.2b) Do you assess your portfolio’s exposure to climate-related risks and opportunities?

<table>

</tbody>
</table>
C-FS2.2d

(C-FS2.2d) Does your organization consider climate-related information about your clients/investees as part of your due diligence and/or risk assessment process?

<table>
<thead>
<tr>
<th>Organization</th>
<th>We consider climate-related information</th>
<th>Explain why you do not consider climate-related information and your plans to address this in the future</th>
</tr>
</thead>
<tbody>
<tr>
<td>Banking (Bank)</td>
<td>Yes</td>
<td></td>
</tr>
<tr>
<td>Investing (Asset manager)</td>
<td>Yes</td>
<td></td>
</tr>
<tr>
<td>Investing (Asset owner)</td>
<td>Yes</td>
<td></td>
</tr>
<tr>
<td>Insurance underwriting</td>
<td>No, and we do not plan to in the next two years</td>
<td>Climate related information is not deemed relevant to measure the risks in our life insurance portfolio. For our non-life underwriting we base our risk assessment on historical claims, which would include impacts from climate change.</td>
</tr>
<tr>
<td>(Insurance company)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

C-FS2.2e

(C-FS2.2e) Indicate the climate-related information your organization considers about clients/investees as part of your due diligence and/or risk assessment process, and how this influences decision-making.

**Portfolio**
Investing (asset manager)

**Type of climate-related information considered**
- Emissions data
- Emissions reduction targets
- Climate transition plans
- TCFD disclosures

**Process through which information is obtained**
- Directly from the client/investee
- From an intermediary or business partner
Data provider

**Industry sector(s) covered by due diligence and/or risk assessment process**
- Energy
- Materials
- Capital Goods
- Commercial & Professional Services
- Transportation
- Automobiles & Components
- Consumer Durables & Apparel
- Consumer Services
- Retailing
- Food & Staples Retailing
- Food, Beverage & Tobacco
- Household & Personal Products
- Health Care Equipment & Services
- Pharmaceuticals, Biotechnology & Life Sciences
- Software & Services
- Technology Hardware & Equipment
- Semiconductors & Semiconductor Equipment
- Telecommunication Services
- Media & Entertainment
- Utilities
- Real Estate
- Other, please specify

We do not limit ourselves to particular categories of investments when applying our due diligence / risk assessment process.

**State how this climate-related information influences your decision-making**
Aegon will seek to continue to improve its climate change strategy, governance, and approach to risk and opportunity measurement and implementation in the coming years. Aegon will look to increase the breadth of disclosures and further incorporate climate considerations across the business as appropriate.

---

**Portfolio**
Investing (asset owner)

**Type of climate-related information considered**
- Emissions data
- Emissions reduction targets

We do not limit ourselves to particular categories of investments when applying our due diligence / risk assessment process.

State how this climate-related information influences your decision-making

Aegon will seek to continue to improve its climate change strategy, governance, and approach to risk and opportunity measurement and implementation in the coming years. For example, in 2022 we expect to further enhance our 2025 targets to meet Net-Zero Asset Owner Alliance membership requirements. As the company’s experience with climate issues grows, Aegon will look to increase the breadth of disclosures and further incorporate climate considerations across the business as appropriate.

C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

Yes

C2.3a

(C2.3a) Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.
Risk 1

Where in the value chain does the risk driver occur?
Direct operations

Risk type & Primary climate-related risk driver
Acute physical
Other, please specify
Any category of ‘acute physical’ risk driver

Primary potential financial impact
Increased direct costs

Your version of Excel allows you to read this threaded comment; however, any edits to it will get removed if the file is opened in a newer version of Excel. Learn more: https://go.microsoft.com/fwlink/?linkid=870924

Comment:
Climate risk type mapped to traditional financial services industry risk classification
Operational risk

Company-specific description
Risk 1: Damage to Aegon physical property. Severe events could damage Aegon’s physical assets due to severe weather and climate-related disasters resulting in business disruption, financial loss and reputational damage.

Time horizon
Medium-term

Likelihood
About as likely as not

Magnitude of impact
Medium

Are you able to provide a potential financial impact figure?
No, we do not have this figure

Potential financial impact figure (currency)

Potential financial impact figure – minimum (currency)

Potential financial impact figure – maximum (currency)

Explanation of financial impact figure
The risk of business interruption could occur at any time. We have contingency plans in place to recover operations so that service to clients is not interrupted. We have contracted with offsite service providers for temporary office space and staff have the ability to work remotely if necessary. We have not made precise estimates of the costs involved.

Cost of response to risk

Description of response and explanation of cost calculation
Business interruption is a risk that is monitored on an ongoing basis by our operational risk management teams.

Comment
There is no additional cost to managing this risk as our operational risk management teams are already monitoring business interruption risk as one of our ongoing operational risks.

Identifier
Risk 2

Where in the value chain does the risk driver occur?
Investing (Asset owner) portfolio

Risk type & Primary climate-related risk driver
Acute physical
Other, please specify
  Any category of ‘acute physical’ risk driver

Primary potential financial impact
Decreased asset value or asset useful life leading to write-offs, asset impairment or early retirement of existing assets

[Threaded comment]

Your version of Excel allows you to read this threaded comment; however, any edits to it will get removed if the file is opened in a newer version of Excel. Learn more: https://go.microsoft.com/fwlink/?linkid=870924

Comment:

Climate risk type mapped to traditional financial services industry risk classification
Market risk

Company-specific description
Risk 2: Decreased profitability arising from damage to assets. Severe weather events could result in damage to Aegon assets (assets include real estate, shares, stocks, bonds etc.) resulting in increased claims.

**Time horizon**
Short-term

**Likelihood**
About as likely as not

**Magnitude of impact**
Medium-high

**Are you able to provide a potential financial impact figure?**
No, we do not have this figure

**Potential financial impact figure (currency)**

**Potential financial impact figure – minimum (currency)**

**Potential financial impact figure – maximum (currency)**

**Explanation of financial impact figure**
Decreased asset value or asset useful life leading to write-offs, asset impairment or early retirement of existing assets.

**Cost of response to risk**

**Description of response and explanation of cost calculation**

**Comment**
This is an ongoing process and so we do not foresee an additional internal cost to managing this risk as our operational risk management teams are already monitoring developments in this area.

**Identifier**
Risk 3

**Where in the value chain does the risk driver occur?**
Investing (Asset owner) portfolio

**Risk type & Primary climate-related risk driver**
Market
Uncertainty in market signals
Primary potential financial impact
Decreased asset value or asset useful life leading to write-offs, asset impairment or early retirement of existing assets

Climate risk type mapped to traditional financial services industry risk classification
Market risk

Company-specific description
Risk 3: Write-down of investments due to low-carbon transition, for example due to changing regulatory requirements or other disruptive industry changes resulting in reputational damage and financial loss.

Time horizon
Short-term

Likelihood
Likely

Magnitude of impact
Medium-high

Are you able to provide a potential financial impact figure?
No, we do not have this figure

Potential financial impact figure (currency)

Potential financial impact figure – minimum (currency)

Potential financial impact figure – maximum (currency)

Explanation of financial impact figure
It is difficult to estimate the possible negative impact on financial returns as a result of potential devaluation of investments in our portfolio.

Cost of response to risk

Description of response and explanation of cost calculation
Aegon’s Responsible Investment policy plays a key role by guiding our investment activities, from governance to ESG positions and exclusions. Aegon's portfolio managers incorporate climate-related factors in their investment decision making process, including vulnerability of investments to policy and legal changes. Aegon worked with a third party to perform a systematic climate risk-aware assessment for the general account and insurance-linked assets of Aegon Netherlands. Modelling results indicated that the current asset allocation renders the portfolio rather robust to key systematic climate change drivers - both transitional risks, as well as slow-onset physical risks - across all modeled climate scenarios.

Comment
This is an ongoing process and so we do not foresee an additional internal cost for our portfolio managers to continue monitoring developments in this area.

Where in the value chain does the risk driver occur?
Insurance underwriting portfolio

Risk type & Primary climate-related risk driver
Market
Changing customer behavior

Primary potential financial impact
Increased credit risk

[Threaded comment]
Climate risk type mapped to traditional financial services industry risk classification

Insurance risk

Company-specific description
Risk 6: Changing expectations due to climate risk to changing life expectancy. The risk of changing life expectancy could impacts the models and underwriting of insurance, impacting the Aegon business model.

Time horizon
Medium-term

 Likelihood
Exceptionally unlikely

Magnitude of impact
Medium

Are you able to provide a potential financial impact figure?
No, we do not have this figure

Potential financial impact figure (currency)

Potential financial impact figure – minimum (currency)

Potential financial impact figure – maximum (currency)

Explanation of financial impact figure

Cost of response to risk

Description of response and explanation of cost calculation
Aegon takes actions on all mentioned aspects of climate risks. Aegon seeks to reduce its exposure to the physical risks through risk selection, risk monitoring, and purchasing reinsurance. We have implemented a Responsible Investment Policy to ensure that environmental, social and governance issues are taken into consideration as part of our investment decision making process.

Comment
This is an ongoing process and so we do not foresee an additional internal cost to managing this risk as our operational Risk Management team is already monitoring developments in this area.

Company-specific description
As an investor, Aegon has an important role to play in supporting the climate transition. By making climate-smart investment choices, we can contribute to a cleaner, healthier environment and provide our clients with opportunities to minimize their own climate impacts. Climate change continues to be a focus of our investment strategy and is guided by the Aegon N.V. Responsible Investment Policy, for example:

- At the end of 2021 Aegon Asset Management had EUR 177.7 billion in assets under management/advisement invested in responsible investment solutions which are expected to have some positive climate contribution (or at least avoiding significant harm) via either exclusion (including specific climate change exclusionary criteria as part of the Responsible Investment Policy), positive screening or targeted investment themes.

Time horizon
Long-term

Likelihood
Very likely

Magnitude of impact
Medium-high
Are you able to provide a potential financial impact figure?
No, we do not have this figure

Potential financial impact figure (currency)

Potential financial impact figure – minimum (currency)

Potential financial impact figure – maximum (currency)

Explanation of financial impact figure
At the end of 2021 Aegon Asset Management had EUR 177.7 billion in assets under management/advisement invested in responsible investment solutions which are expected to have some positive climate contribution (or at least avoiding significant harm) via either exclusion (including specific climate change exclusionary criteria as part of the Responsible Investment Policy), positive screening or targeted investment themes.

Cost to realize opportunity

Strategy to realize opportunity and explanation of cost calculation
As the effects of climate change become increasingly palpable, the need for action has never been more urgent, or more universal. Only then can people live their best lives. As an insurance company, Aegon can support the transition to a climate-resilient economy and a net-zero world using both sides of its balance sheet. We finance the upside through our responsible investment activities, while mitigating the downside through integrating ESG into our risk management processes and the savings and protection solutions we provide. The influence, both positive and negative, we can have as an investor is particularly significant.

Comment
The Responsible Investment Solutions (RIS) detailed here cover both proprietary (owned) and non-proprietary (managed) assets of third party clients.

**Company-specific description**
As an investor, Aegon has an important role to play in supporting the climate transition. By making climate-smart investment choices, we can contribute to a cleaner, healthier environment and provide our clients with opportunities to minimize their own climate impacts through transitioning our General Account investment portfolio to net-zero GHG emissions by 2050. To-date we have set a reduction target in the weighted average carbon intensity of our corporate fixed income and listed equity investments; by 25% for 2025 against a 2019 baseline. We will look to further substantiate this commitment over the coming years with additional science-based targets.

**Time horizon**

Company-specific description
As an investor, Aegon has an important role to play in supporting the climate transition. By making climate-smart investment choices, we can contribute to a cleaner, healthier environment and provide our clients with opportunities to minimize their own climate impacts. Climate change continues to be a focus of our investment strategy, for example:

- Mortgages and loans comprise 30% of Aegon's General Account investment portfolio as an asset class. Aegon Hypotheken is moving towards an energy-neutral mortgage portfolio in 2050, which point we will only be financing housing with net zero energy consumption. To achieve this, help our customers identify the steps they can take to improve the energy efficiency of their home. We then offer up to EUR 9k additional finance on an existing mortgage to fund those improvements. This provides a financial opportunity around the adaptation of existing housing stock in the Netherlands.

Company-specific description
Climate change has been a focus of Aegon’s investment strategy since 2014, and the Company continues to investigate opportunities arising from climate change and the energy transition. Aegon closely monitors regulatory and market trends to understand how these changes may influence the Company’s business. Aegon translates these developments into new products and services designed to meet the needs of its clients now and in the future. We continue to investigate the market for clean energy investments and want to contribute to making these projects investable. At the end of 2019 we had over EUR 200 billion in AuM invested in responsible investment solutions which are expected to have some positive climate contribution via either exclusion, positive screening or targetted investment theses.

Time horizon
Long-term

**Likelihood**
Very likely

**Magnitude of impact**
Medium-low

Are you able to provide a potential financial impact figure?

**Potential financial impact figure (currency)**

**Potential financial impact figure – minimum (currency)**

**Potential financial impact figure – maximum (currency)**

**Explanation of financial impact figure**
Impact investing is an emerging area that we continue to monitor for future opportunities. As governments continue to stimulate the green economy we believe there will be more attractive investment opportunities for our portfolio which our investors, our customers and wider society can benefit from. We will continue to work with partners to broaden our distribution channel and seek opportunities in the market place for products and services with positive impacts for climate change and the environment.

**Cost to realize opportunity**

**Strategy to realize opportunity and explanation of cost calculation**
Climate change has been a focus of Aegon's investment strategy since 2014, and the Company continues to investigate opportunities arising from climate change and the energy transition. Aegon closely monitors regulatory and market trends to understand how these changes may influence the Company's business. Aegon translates these developments into new products and services designed to meet the needs of its clients now and in the future. We continue to investigate the market for clean energy investments and want to contribute to making these projects investable. In terms of our investments in real estate, we have a working group with representatives from our US, UK and Dutch businesses and going forward in 2019 the group will agree a new action plan to examine commercial opportunities and how real estate investments can be linked to Aegon's longer-term climate goals.

**Comment**
The process for monitoring opportunities in this area are already in place as part of our Responsible Investment Team and portfolio managers, so there is no additional cost to the business.

C3. Business Strategy

C3.1

(C3.1) Does your organization’s strategy include a transition plan that aligns with a 1.5°C world?

Row 1

Transition plan
   Yes, we have a transition plan which aligns with a 1.5°C world

Publicly available transition plan
   No

Mechanism by which feedback is collected from shareholders on your transition plan
   We have a different feedback mechanism in place

Description of feedback mechanism
Aegon seeks to ensure the reduction of the weighted average carbon intensity of the company’s investment portfolio is aligned to its net-zero ambitions, for the benefit of wider society. Aegon has introduced a new KPI weighted average carbon intensity metric for our corporate fixed income and listed equity. This KPI is reflected in the Executive Board remuneration targets set at both a company-wide and individual level in 2021.

**Frequency of feedback collection**
Annually

**Attach any relevant documents which detail your transition plan (optional)**

(C3.2b) Provide details of the focal questions your organization seeks to address by using climate-related scenario analysis, and summarize the results with respect to these questions.

Row 1

<table>
<thead>
<tr>
<th>Focal questions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aegon seeks to identify investment portfolio weak spots - in terms of asset type, geography and sector - to aid decision making in responding to climate risk. Our analysis seeks to contextualize these questions for our portfolio according to three plausible climate pathways (orderly, disorderly and failed transitions) in order to explore potential future climate policies, interventions, and consequences of the world failing to mitigate climate change.</td>
</tr>
</tbody>
</table>

N.B. These three climate pathways are in line with the industry standard IPCC and Network of Central Banks and Supervisors for Greening the Financial System (NGFS) emission and climate scenarios.

Results of the climate-related scenario analysis with respect to the focal questions

Modelling results indicate resilience of the Aegon General Account portfolio allocation to key systemic climate risk drivers across all modelled climate scenarios. High allocation of fixed income assets is the key driver that limits the cumulative climate-related impact on returns over a 40-year horizon. Continuing to monitor developments in climate science, policy, technology and consumer sentiment will remain critical for understanding and adapting to the future.

The results provide an initial directional signal; however, climate-related risks are dynamic in nature. Transition risks are expected to dominate in the near to medium term (certainly to 2030) if society is to achieve the objectives of the Paris Agreement while physical risks will materialize at any time as global temperatures continue to rise. As a result, continuing to monitor developments in climate science, policy, technology and consumer sentiment is critical for understanding and adapting to the future.

(C3.3) Describe where and how climate-related risks and opportunities have influenced your strategy.
<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>Products and services</td>
<td>Yes</td>
</tr>
<tr>
<td>Supply chain and/or value chain</td>
<td>Evaluation in progress</td>
</tr>
</tbody>
</table>
| Investment in R&D | Yes | Case study: Global General Account scenario analysis:

Aegon worked with Ortec Finance to perform an extensive and systematic climate risk assessment for the General and Separate Account assets of all business units within Aegon. The outcomes enable Aegon to identify portfolio weak spots - in terms of asset type, geography and sector - to aid decision making in responding to climate risk.

The analysis investigated three plausible climate pathways (orderly, disorderly and failed transitions) to explore potential future climate policies, interventions, and consequences of the world failing to mitigate climate change. These pathways are in line with the industry standard IPCC and Network of Central Banks and Supervisors for Greening the Financial System (NGFS) emission and climate scenarios.

The employed climate model translates transition (i.e. policy & technological changes) and physical risks (i.e. gradual impact & extreme weather events) associated with climate change to produce a climate change adjusted economic and financial outlook.

Modelling results indicate resilience of the Aegon General Account portfolio allocation to key systemic climate risk drivers across all modelled climate scenarios. High allocation of fixed income assets is the key driver that limits the cumulative climate-related impact on returns over a 40-year horizon. Continuing to monitor developments in climate science, policy, technology and consumer sentiment will remain critical for understanding and adapting to the future. |
The results provide an initial directional signal; however, climate-related risks are dynamic in nature. Transition risks are expected to dominate in the near to medium term (certainly to 2030) if society is to achieve the objectives of the Paris Agreement while physical risks will materialize at any time as global temperatures continue to rise. As a result, continuing to monitor developments in climate science, policy, technology and consumer sentiment is critical for understanding and adapting to the future.

In line with our commitment to transition our general account investment portfolio to net-zero greenhouse gas (GHG) emissions by 2050, Aegon has set a supporting target to reduce the carbon footprint of its operational activities by 25% by 2025, compared to the 2019 baseline. The target includes the consumption of natural gas and electricity. In 2021, the carbon footprint of Aegon’s operational activities was 54% lower than 2019. While some of these reductions can be traced to our initiatives to stimulate hybrid working - which for instance led to the closing of several offices in Iowa in 2021 - there has also been a temporary benefit from fewer employees in the office due to the COVID-19 pandemic, which we expect to reverse over time. Through implementing our hybrid working policy and other initiatives, we will work towards achieving our target. Aegon will also look towards expanding the scope of measurement of our greenhouse gas emissions and explore setting further targets against these in the future.

C3.4

(C3.4) Describe where and how climate-related risks and opportunities have influenced your financial planning.

<table>
<thead>
<tr>
<th>Financial planning elements that have been influenced</th>
<th>Description of influence</th>
</tr>
</thead>
<tbody>
<tr>
<td>Revenues</td>
<td>The Solvency II framework imposes prudential requirements at group level as well as on the individual EU insurance companies in the Aegon Group. Solvency II contains economic, risk-based capital requirements for insurance companies. The Solvency II approach to prudential supervision can be described as a ‘total balance sheet-approach,’ and takes material risks to which insurance companies are exposed into account, as well as the interaction between risks. Notably, the Own Risk and Solvency Assessment (ORSA) process (a requirement of Solvency II) has seen climate change risk gaining in prominence and is addressed</td>
</tr>
<tr>
<td>Assets</td>
<td>in the ORSA process.</td>
</tr>
<tr>
<td>--------</td>
<td>---------------------</td>
</tr>
</tbody>
</table>

The Solvency II framework is structured along three pillars:

Pillar 1 comprises quantitative requirements (including technical provisions, valuation of assets and liabilities, solvency requirements and own fund requirements).

Pillar 2 requirements include governance and risk management requirements, and requirements for effective supervision.

Pillar 3 consists of disclosure and supervisory reporting requirements.

These three pillars should not only be considered in isolation, but also in terms of how they interact with one another. More complex risks, for instance, require a stronger risk management and governance structure or could lead to higher capital requirements.

With respect to Pillar 2, insurance companies are required to set up and maintain an adequate and effective system of governance, which includes an appropriate internal organization, a risk governance system and an effective assessment of the risk and solvency position of the Company, including a prospective assessment of risks, through the Own Risk and Solvency Assessment (ORSA) process. An example of a risk that has gained more prominence, is climate risk, which is addressed in the ORSA process.

**C3.5**

(C3.5) In your organization’s financial accounting, do you identify spending/revenue that is aligned with your organization’s transition to a 1.5°C world?

No, but we plan to in the next two years

**C-FS3.6**

(C-FS3.6) Does the policy framework for your portfolio activities include climate-related requirements for clients/investees, and/or exclusion policies?

Yes, we have exclusion policies for industries and/or activities exposed or contributing to climate-related risks

**C-FS3.6b**

(C-FS3.6b) Provide details of your exclusion policies related to industries and/or activities exposed or contributing to climate-related risks.
Portfolio
Investing (Asset manager)
Investing (Asset owner)

Type of exclusion policy
Thermal coal

Year of exclusion implementation

Description
The Aegon N.V. Responsible Investment Policy ("RI Policy") was most recently updated in March 2022. The Policy acts as the basis for how our assets should be managed consistently with our responsible business objectives and relevant laws and governance standards. It is applicable to all of our proprietary assets globally, regardless of country of operation or whether they are managed by Aegon business units or externally.

Changes in the exclusion list do not immediately apply to existing investments. Listed equity positions are divested as soon as practically possible. Bond holdings may be held until maturity. Private equity and debt may be sold when there is a reasonable opportunity, according to the respective portfolio manager’s judgement and respecting our fiduciary responsibilities.
Timeframe for complete phase-out
Other, please explain
Companies that produce more than 20 million tons of thermal coal annually and are actively expanding exploration, mining or refining operations.

C-FS3.6c

(C-FS3.6c) Why does the policy framework for your portfolio activities not include climate-related requirements for clients/investees, and/or exclusion policies?

Aegon N.V. Responsible Investment Policy (“RI Policy”)

Purpose

The RI Policy acts as the basis for how our assets should be managed consistently with our responsible business objectives and relevant laws and governance standards. It is applicable to all of our proprietary assets globally, regardless of country of operation or whether they are managed by Aegon business units or externally. Our RI Policy includes a number of climate change-related considerations to support the reduction of harm from new investments in our general account portfolios. This includes but is not limited to exclusions related to thermal coal, oil sands, and arctic oil and gas. Local business units within Aegon may implement additional mechanisms / restrictions to further identify, manage and mitigate ESG risks, within the context of local norms and stakeholder expectations.

Governance

Local policies: Although this RI Policy sets the minimum requirements for Aegon, we recognize that views on RI topics can vary greatly by country. We aim to develop an RI approach that closely reflects the preferences and standards of our clients and other stakeholders in all countries where we operate. In addition, as long as there is no conflict with this policy, Aegon
business units are encouraged to develop supplemental RI policies, governance and activities or solutions to meet local requirements and customer demand, ensure decision-making that is closely linked to the business, and maintain relationships with local stakeholders.

(C-FS3.7a) Provide details of the climate-related requirements included in your selection process and engagement with external asset managers.

Coverage

Minority of assets managed externally

Mechanisms used to include climate-related requirements in external asset manager selection

Other, please specify

Pls see monitoring process.

Describe how you monitor and engage with asset managers to ensure investment activities are consistent with your climate strategy

When selecting an external manager for our multi-management (MM) fund range, we systematically assess the ESG Integration - including climate - in their investment process:

• Culture of the firm: whether the firm has a clear commitment to ESG Integration and to the consideration of adverse impacts, which can be signaled by memberships of various organizations, the reporting framework and the availability and clarity of information about ESG concerns.

• Culture of the team: how comfortable the investment team is with ESG topics relevant to the portfolio, the extent to which it is discussed internally and externally by the team and the team’s philosophy on ESG integration and the management of adverse impacts.

• Organization: quality of the organizational structure around ESG Risk and Adverse
Impacts, for instance access to external ESG information and presence of dedicated ESG analysts within the team or in a separate department.

- Process: quality and integrity of the process around ESG Integration and the management of Adverse Impacts, as signaled by the actual implementation of ESG integration, the standardization of ESG as a component of the investment decision, the periodical review of portfolios on this basis, and the transparency of engagement.
- Outcomes: the demonstrable impact that ESG Integration and the management of Adverse Impacts have on the investment portfolio’s ESG performance, as evidenced by comparison with a benchmark and by the availability of ESG reports.

For each external manager, our assessment consists of the manager’s performance against these criteria. Based on this analysis we assign a rating to the manager’s RI practices, from A (best) to D (worst). In principle, only A and B rated managers are eligible for our MM Funds. Next to our selection process, we hold periodical reviews of external manager portfolios through the ESG lens. To that end we use specialist ESG research services that allow us to evaluate the portfolio’s performance, giving us insights into potential ESG risks presented in the holdings. If needed, this information enables us to engage in a dialogue with external managers regarding the portfolio ESG profile and performance. In addition, portfolio managers of Aegon AM discuss holdings that score poorly on ESG criteria with the respective external managers periodically. We sometimes ask external managers to engage with issuers to address any ESG issues identified.

Target ambition
Please explain target coverage and identify any exclusions
The scope of non-financial data reported is all entities over which Aegon has management control. Divested businesses (of which closings are finalized by year end), or joint ventures and associates are excluded from the scope unless otherwise stated. The data collection for our ‘Operational footprint’ focuses on our largest operations, namely in the United States, the Netherlands, and the United Kingdom. Based on this data (which covers approximately 81% of our employees), by means of extrapolation, we report on our operational footprint covering all our operating segments.

Plan for achieving target, and progress made to the end of the reporting year
In line with our net-zero investment footprint commitment announced in November 2021, Aegon has set a supporting target to reduce the carbon footprint of its operational activities by 25% by 2025, compared to the 2019 baseline. The target includes the consumption of natural gas and electricity. In 2021, the carbon footprint of Aegon’s operational activities was 54% lower than 2019. While some of these reductions can be traced to our initiatives to stimulate hybrid working - which for instance led to the closing of several offices in Iowa in 2021 - there has also been a temporary benefit from fewer employees in the office due to the COVID-19 pandemic, which we expect to reverse over time. Through implementing our hybrid working policy and other initiatives, we will work towards achieving our target. Aegon will also look towards expanding the scope of measurement of our greenhouse gas emissions and explore setting further targets against these in the future.

We have committed to transitioning our General Account investment portfolio to net-zero GHG emissions by 2050. To-date we have set a reduction target in the weighted average carbon intensity of our corporate fixed income and listed equity investments; by 25% for 2025 against a 2019 baseline. We will look to further substantiate this commitment over the coming years with additional science-based targets.

C4.2

(C4.2) Did you have any other climate-related targets that were active in the reporting year?

Estate rationalization

**Estimated annual CO2e savings (metric tonnes CO2e)**
3,093.56

**Scope(s) or Scope 3 category(ies) where emissions savings occur**
Scope 1
Scope 2 (location-based)

**Voluntary/Mandatory**
Voluntary

**Annual monetary savings (unit currency – as specified in C0.4)**

**Investment required (unit currency – as specified in C0.4)**

**Payback period**

**Estimated lifetime of the initiative**
3-5 years

**Comment**
Estimated annual CO2e savings (metric tonnes CO2e) of 3,093.56 metric tonnes CO2e is an average of operational Scope 1 and Scope 2 (location-based) emission reductions predicted to be achieved over a four-year period (2021-2024), on the basis of 2021 (implemented), 2022 (implementation commenced, and 2023-2024 (implementation planned). CO2e savings are based on rationalization of estate and do not factor-in additional (projected) reductions in the carbon intensity of electricity generation over the period. As such, CO2e savings could be greater than predicted to 2025.

Comment
Operational Scope 1 GHG emissions are based on the gas consumption of our four largest business units (Transamerica, Aegon the Netherlands, Aegon UK and Aegon Asset Management), which in 2021 comprised 81% of our global (direct employee) headcount. We source GHG emission conversion factors for gas consumption from the UK Department for Environment, Food & Rural Affairs (Defra) (100% mineral for the US, and 5% biofuel blend for the Netherlands and the UK). As part of the calculation of GHG emissions, the underlying activity data is extrapolated to cover for unmeasured headcount.

Comment

Operational Scope 2 GHG emissions are based on the electricity consumption of our four largest business units (Transamerica, Aegon the Netherlands, Aegon UK and Aegon Asset Management), which in 2021 comprised 81% of our global (direct employee) headcount. GHG emissions are calculated according to the ‘market’ and ‘location’ based methodologies of the GHG Protocol, on a country-level basis and using locally applicable emission conversion factors. For the market-based measurement we source conversion factors for electricity consumption from individual suppliers, 99% of which in 2021 was zero carbon through our purchase of renewable electricity in the form of ‘green tariff’ supply contracts and renewable energy certificates (RECs). For the location-based approach, we source conversion factors for electricity consumption from the Environmental Protection Agency (eGRID) for the US, from the European Environment Agency for the Netherlands and from the Department for Environment, Food & Rural Affairs (Defra) for the UK. As part of the calculation of GHG emissions, the underlying activity data is extrapolated to cover unmeasured headcount. Supporting data and calculation methodology for measurement of GHG emissions has been re-evaluated for the 2019 baseline year, and applied to the 2021 reporting year. Operational Scope 2 GHG emissions for 2020 have not been recalculated, and to avoid inconsistency have been omitted from reporting.

C6.4

Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure?

No

C6.5

Account for your organization’s gross global Scope 3 emissions, disclosing and explaining any exclusions.

Purchased goods and services

Evaluation status
Relevant, not yet calculated

Please explain
As a provider of financial services (insurance and pensions), ‘purchased goods and services’ involved in the production and delivery of those (financial) services are a relatively limited source of our Scope 3 GHG emissions. Nevertheless, Aegon is currently rolling out the EcoVadis platform to enhance the management of our supply chain from an Environment, Social and Governance perspective; potentially enabling us to evaluate the materiality of this source in our Scope 3 emissions.

Capital goods

Evaluation status
Not relevant, explanation provided
Please explain
As a provider of financial services (insurance and pensions), 'capital goods' involved in
the production and delivery of those services are limited and as such do not comprise a
material source of our Scope 3 GHG emissions.

Fuel-and-energy-related activities (not included in Scope 1 or 2)

| Evaluation status                        | Relevant, not yet calculated |

Please explain
As a provider of financial services (insurance and pensions) Aegon is not an energy-intensive business. As such, Scope 3 emissions associated with our energy consumption, largely electricity distribution losses, are relatively immaterial.

Upstream transportation and distribution

| Evaluation status                        | Not relevant, explanation provided |

Please explain
As a provider of financial services (insurance and pensions), we have not identified GHG emissions with relation to upstream transportation and distribution that would constitute a material contribution to our Scope 3 emissions.

Waste generated in operations

| Evaluation status                        | Not relevant, explanation provided |

Please explain
As a provider of financial services (insurance and pensions), with regards to GHG emissions associated with 'waste generated in operations', Aegon does not generate significant quantities of waste from the delivery of its services. Furthermore, Aegon has not identified any waste types (within that limited quantity) that comprise material sources of GHG emissions in their treatment and processing in their own right.

Business travel

| Evaluation status                        | Relevant, calculated |

Emissions in reporting year (metric tons CO\text{2e})
2,101

Emissions calculation methodology
Distance-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100
Please explain

In terms of calculation of Scope 3 GHG emissions arising from business (air) travel, Aegon has contracted travel booking agents who supply data on distance travelled (route type) and seat class, and calculates the associated GHG emissions for the specifics of each leg of any air travel. Before using the data, Aegon spot-checks the validity of the data by journey (leg): 1) Verifying calculation of distance travelled on a point to point basis (using great circle distance), 2) Verifying the assignment of the appropriate route type (Domestic/Short Haul, Medium Haul, Long Haul) according to the distance travelled and 3) Verifying the application of the appropriate GHG emission factor for each leg, taking into account seat class travelled and cross referencing that with the latest available source of published emission conversion factors for air travel (the UK Government GHG Conversion Factors for Company Reporting 2021: https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1049333/conversion-factors-2021-full-set-advanced-users.xlsm). Please note that Aegon has not applied emission conversion factors that take into account radiative forcing while the science around this is uncertain. Please also note that we do not believe there is any material air travel booked outside of our dedicated systems.

Employee commuting

Evaluation status
Relevant, not yet calculated

Please explain
Aegon does not currently measure GHG emissions associated with ‘employee commuting’ across the entire business. However some of our business units (e.g. Aegon Spain) run their own programmes to manage employee commuting and measure their success by distance and GHG emissions saved. Aegon has set a target to reduce the carbon footprint of its operational activities by 25% by 2025, compared to a 2019 baseline. Aegon will also look towards expanding the scope of measurement of our GHG emissions and explore setting further targets against these in the future.

Upstream leased assets

Evaluation status
Not relevant, explanation provided

Please explain
As a provider of financial services (insurance and pensions), ‘upstream leased assets’ involved in the production and delivery of those services are very limited and as such do not comprise a material source of our Scope 3 GHG emissions.

Downstream transportation and distribution

Evaluation status
Not relevant, explanation provided

Please explain
As a provider of financial services (insurance and pensions), ‘downstream transport and distribution’ involved in the delivery of those services is very limited and as such does not comprise a material source of our Scope 3 GHG emissions.

**Processing of sold products**

**Evaluation status**
Not relevant, explanation provided

**Please explain**
As a provider of financial services (insurance and pensions), ‘processing of sold products’ as part of the process in the delivery of those services is very limited and as such does not comprise a material source of our Scope 3 GHG emissions.

**Use of sold products**

**Evaluation status**
Not relevant, explanation provided

**Please explain**
As a provider of financial services (insurance and pensions), ‘use of sold products’ does not comprise a material source of our Scope 3 GHG emissions.

**End of life treatment of sold products**

**Evaluation status**
Not relevant, explanation provided

**Please explain**
As a provider of financial services (insurance and pensions), ‘end of life treatment of sold products’ does not comprise a material source of our Scope 3 GHG emissions.

**Downstream leased assets**

**Evaluation status**
Not relevant, explanation provided

**Please explain**
As a provider of financial services (insurance and pensions), ‘end of life treatment of sold products’ does not comprise a material source of our Scope 3 GHG emissions.

**Franchises**

**Evaluation status**
Not relevant, explanation provided

**Please explain**
Aegon defines its GHG measurement boundary as wholly owned businesses (i.e. under Operational Control). There are no franchise arrangements within this reporting boundary.

**Other (upstream)**
Evaluation status
Not relevant, explanation provided

Please explain
As a provider of financial services (insurance and pensions), 'other (upstream)' sources involved in the production and delivery of those services are very limited and as such do not comprise a material source of our Scope 3 GHG emissions.

Other (downstream)

Evaluation status
Not relevant, explanation provided

Please explain
As a provider of financial services (insurance and pensions), 'other (downstream)' sources involved in the production and delivery of those services are very limited and as such do not comprise a material source of our Scope 3 GHG emissions.

C6.5a

(C6.5a) Disclose or restate your Scope 3 emissions data for previous years.

Past year 1

Start date
January 1, 2020

End date
December 31, 2020

Scope 3: Purchased goods and services (metric tons CO2e)

Scope 3: Capital goods (metric tons CO2e)

Scope 3: Fuel and energy-related activities (not included in Scopes 1 or 2) (metric tons CO2e)

Scope 3: Upstream transportation and distribution (metric tons CO2e)

Scope 3: Waste generated in operations (metric tons CO2e)

Scope 3: Business travel (metric tons CO2e)

Scope 3: Employee commuting (metric tons CO2e)
Scope 3: Upstream leased assets (metric tons CO2e)

Scope 3: Downstream transportation and distribution (metric tons CO2e)

Scope 3: Processing of sold products (metric tons CO2e)

Scope 3: Use of sold products (metric tons CO2e)

Scope 3: End of life treatment of sold products (metric tons CO2e)

Scope 3: Downstream leased assets (metric tons CO2e)

Scope 3: Franchises (metric tons CO2e)

Scope 3: Other (upstream) (metric tons CO2e)

Scope 3: Other (downstream) (metric tons CO2e)

Comment

Supporting data and calculation methodology for measurement of operational Scope 1 and 2 GHG emissions has been re-evaluated for the 2019 baseline year for our operational GHG reduction target. Operational Scope 1 and 2 GHG emissions for 2020 have not been recalculated, and to avoid inconsistency have been omitted from reporting. To this end, operational Scope 3 GHG emissions (air travel), while not part of that target, have neither been recalculated and have also been omitted from reporting.

Past year 2

Start date
January 1, 2019

End date
December 31, 2019

Scope 3: Purchased goods and services (metric tons CO2e)

Scope 3: Capital goods (metric tons CO2e)

Scope 3: Fuel and energy-related activities (not included in Scopes 1 or 2) (metric tons CO2e)

Scope 3: Franchises (metric tons CO2e)

Scope 3: Other (upstream) (metric tons CO2e)

Scope 3: Other (downstream) (metric tons CO2e)

Comment
Supporting data and calculation methodology for measurement of operational Scope 1 and 2 GHG emissions has been re-evaluated for the 2019 baseline year for our operational GHG reduction target. Operational Scope 3 GHG emissions (air travel), while not part of that target, have nevertheless been re-calculated and re-stated.

C6.10
(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.
Intensity figure
0.87

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)
21,923

Metric denominator
unit total revenue

Metric denominator: Unit total
25,171

Scope 2 figure used
Location-based

% change from previous year
41.3

Direction of change
Decreased

Reason for change
Scope 1+2 (location-based) GHG emissions / EUR million revenue. Supporting data and calculation methodology for measurement of GHG emissions has been re-evaluated for the 2019 baseline year, and applied to the 2021 reporting year. Operational GHG emissions for 2020 have not been recalculated, and to avoid inconsistency have been omitted from reporting.

The change expressed here concerns 2019 to 2021. In 2021, this revenue metric of the carbon footprint of Aegon’s Scope 1 and Scope 2 (location-based) operational activities reduced by 41.3% compared with 2019. While some of these reductions can be traced to our initiatives to stimulate hybrid working - which for instance led to the closing of several offices in Iowa in 2021 - there has also been a temporary benefit from fewer employees in the office due to the COVID-19 pandemic, which we expect to reverse over time.

Intensity figure
0.23

</tbody>
</table>

Data for the previous reporting year (2020) is not available, this is because Aegon focused on re-calibrating its 2019 emission reporting as the baseline for our target to reduce the carbon footprint of our operational activities by 25% by 2025 (using the location-based measurement). So, on the basis of comparison to the reported 2019 year, in 2021, the carbon footprint of Aegon’s operational activities (Scope 1+2) reduced by 47.5% compared. While some of these reductions can be traced to our initiatives to stimulate hybrid working for instance reductions in leased space across the US in 2021 there has also been a temporary benefit from fewer employees in the office due to the COVID-19 pandemic, which we expect to reverse over time. Through implementing our hybrid working policy and other initiatives, we will work towards achieving our target. Aegon will also look towards expanding the scope of measurement of our GHG emissions and explore setting further targets against these in the future.

**C7.9b**

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?

Location-based

**C8. Energy**

**C8.1**

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

More than 0% but less than or equal to 5%
## C8.2

**(C8.2) Select which energy-related activities your organization has undertaken.**

<table>
<thead>
<tr>
<th>Activity</th>
<th>Indicate whether your organization undertook this energy-related activity in the reporting year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consumption of fuel (excluding feedstocks)</td>
<td>Yes</td>
</tr>
<tr>
<td>Consumption of purchased or acquired electricity</td>
<td>Yes</td>
</tr>
<tr>

Electricity (renewable) 49,283 MWh

Metric denominator (intensity metric only)
Electricity (total) 49,863 MWh

% change from previous year  
1

Direction of change
Increased

Please explain
Renewable electricity as a proportion of total electricity consumption was 99% in 2021 compared to 98% in 2019. Scope 1+2 (location-based) GHG emissions / employee. Supporting data and calculation methodology for measurement of GHG emissions has been re-evaluated for the 2019 baseline year, and applied to the 2021 reporting year.
Operational GHG emissions for 2020 have not been recalculated, and to avoid inconsistency have been omitted from reporting. The change expressed here concerns 2019 to 2021.

**Metric value**

64

**Metric numerator**

Renewable (Electricity) 49,283 MWh

**Metric denominator (intensity metric only)**

Energy (total) 77,151 MWh

**% change from previous year**

8

**Direction of change**

Decreased

**Please explain**

Renewable energy as a proportion of total energy consumption was 64% in 2021 compared to 72% in 2019. This is because of a change in Aegon’s energy consumption profile since 2019, with gas consumption (Scope 1) decreasing by 9.0%, less than the 40.1% decrease in electricity consumption (Scope 2) over the same period. Consequently, gas makes up a greater proportion of overall energy consumption than it did in 2019. Some of this change can be traced to our initiatives to stimulate hybrid working - which for instance led to the closing of several offices in Iowa in 2021 - there has also been fewer employees in the office due to the COVID-19 pandemic, which greater influence on electricity consumption (lighting, IT equipment etc.) than on gas consumption (which is primarily for office heating and as such stays constant for a stable temperature regardless of the level of occupation of premises.)

<tr>
<td>Implement a stewardship and engagement strategy, with a clear escalation and voting policy, that is consistent with our ambition for all assets under management to achieve net zero emissions by 2050 or sooner</td>
</tr>
<tr>
<td>Engagement with 20 investees with a focus on highest emitters or those responsible for 65% of emission in portfolio (either Direct, Collective, or via Asset Manager)</td>
</tr>
<tr>
<td>Initiate and support dialogue with investee boards to set Paris-aligned strategies</td>
</tr>
<tr>
<td>Encourage better climate-related disclosure practices among investees</td>
</tr>
<tr>
<td>Encourage investees to set a science-based emissions reduction target</td>
</tr>
</tbody>
</table>

% scope 3 emissions as reported in C-FS14.1a/C-FS14.1b

Investing (Asset managers) portfolio coverage

Investing (Asset owners) portfolio coverage

Rationale for the coverage of your engagement

Engagement targeted at investees with increased climate-related risks

Impact of engagement, including measures of success

Our rationale is among other triggers: to engage high emitting companies on setting science based targets by 2025. Measure is the target setting, ideally approved by the SBTI.

C-FS12.2

(C-FS12.2) Does your organization exercise voting rights as a shareholder on climate-related issues?

<table>
<thead>
<tr>
<th>Exercise voting rights as a shareholder on climate-related issues</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1</td>
</tr>
</tbody>
</table>
C-FS12.2a

(C-FS12.2a) Provide details of your shareholder voting record on climate-related issues.

Method used to exercise your voting rights as a shareholder
Exercise voting rights through an external service provider

How do you ensure your shareholder voting rights are exercised in line with your overall climate strategy?
Vote tracking
Review external service provider’s climate-related policies
Review external service provider’s climate-related performance (e.g. active ownership, proxy voting records)
Include climate-related requirements in requests for proposals
Include climate-related requirements in service provider mandates

Percentage of voting disclosed across portfolio

Climate-related issues supported in shareholder resolutions
Climate transition plans
Climate-related disclosures
Aligning public policy position (lobbying)
Emissions reduction targets
Board oversight of climate-related issues

Do you publicly disclose the rationale behind your voting on climate-related issues?

C12.3

(C12.3) Does your organization engage in activities that could either directly or indirectly influence policy, law, or regulation that may impact the climate?

Row 1

Direct or indirect engagement that could influence policy, law, or regulation that may impact the climate
Yes, we engage directly with policy makers
Yes, we engage indirectly through trade associations

Does your organization have a public commitment or position statement to conduct your engagement activities in line with the goals of the Paris Agreement?
No, but we plan to have one in the next two years
Describe the process(es) your organization has in place to ensure that your engagement activities are consistent with your overall climate change strategy

C12.3a

(C12.3a) On what policy, law, or regulation that may impact the climate has your organization been engaging directly with policy makers in the reporting year?

Focus of policy, law, or regulation that may impact the climate
   Mandatory climate-related reporting

Specify the policy, law, or regulation on which your organization is engaging with policy makers
   The US Securities and Exchange Commission ("Commission") is proposing amendments to its rules under the Securities Act of 1933 ("Securities Act") and Securities Exchange Act of 1934 ("Exchange Act") that would require registrants to provide certain climate-related information in their registration statements and annual reports.

Policy, law, or regulation geographic coverage
   National

Country/region the policy, law, or regulation applies to
   United States of America

Your organization’s position on the policy, law, or regulation
   Support with major exceptions

Description of engagement with policy makers
   Aegon’s position is communicated through its membership of the CFO Forum.

Details of exceptions (if applicable) and your organization’s proposed alternative approach to the policy, law or regulation
   As communicated through Aegon’s membership of the CFO Forum, any climate reporting framework developed by the SEC should be fully compatible/interoperable with the global baseline of the International Sustainability Standards Board, at least where they cover the same contents. Similarly, full interoperability and alignment of the EU sustainability reporting standards (ESRS) to the ISSB has also been strongly advocated for.

Have you evaluated whether your organization’s engagement is aligned with the goals of the Paris Agreement?
   Yes, we have evaluated, and it is aligned
Focus of policy, law, or regulation that may impact the climate
Mandatory climate-related reporting

Specify the policy, law, or regulation on which your organization is engaging with policy makers
The European Commission’s proposal for a Corporate Sustainability Reporting Directive (CSRD) envisages the adoption of EU Sustainability Reporting Standards (ESRS) incorporating specific sub-topics (notably ‘Climate Change’).

Policy, law, or regulation geographic coverage
Regional

Country/region the policy, law, or regulation applies to
Europe

Your organization’s position on the policy, law, or regulation
Support with major exceptions

Description of engagement with policy makers
Aegon’s position will be communicated through its membership of the CFO Forum.

Details of exceptions (if applicable) and your organization’s proposed alternative approach to the policy, law or regulation
Aegon’s position will be communicated through its membership of the CFO Forum. At the time of writing, this consultation process is ongoing. It is not unlikely that the position will reflect views already communicated on the US Securities and Exchange Commission (SEC) own climate reporting proposals, in that any ESRS ‘climate change’ standard should be fully compatible/interoperable with the the global baseline of the International Sustainability Standards Board, at least where they cover the same contents. Similarly, interoperability and alignment of the EU sustainability reporting standards (ESRS) to the US SEC proposals (requiring registrants to provide certain climate-related information in their registration statements and annual reports) could be advocated for.

Have you evaluated whether your organization’s engagement is aligned with the goals of the Paris Agreement?
Yes, we have evaluated, and it is aligned

C12.3b

(C12.3b) Provide details of the trade associations your organization engages with which are likely to take a position on any policy, law or regulation that may impact the climate.

Trade association
Other, please specify
CRO Forum

Is your organization’s position on climate change consistent with theirs?
Consistent

Has your organization influenced, or is your organization attempting to influence their position?
We publicly promote their current position

State the trade association’s position on climate change, explain where your organization’s position differs, and how you are attempting to influence their position (if applicable)
The CRO Forum is a group of professional risk managers from the insurance industry that focuses on developing and promoting industry best practices in risk management, including areas of emerging risk, such as climate change. In the CRO Forum’s 2019 position paper, “The Heat is On: Insurability and resilience in a Changing Climate,” the Forum outlines the principal implications of climate change for the insurance industry, both from an underwriting and investment perspective and outlines industry best practices in risk management with respect to climate change.

Funding figure your organization provided to this trade association in the reporting year, if applicable (currency as selected in C0.4) (optional)

Describe the aim of your organization’s funding

Have you evaluated whether your organization’s engagement with this trade association is aligned with the goals of the Paris Agreement?
Yes, we have evaluated, and it is aligned

Trade association
Other, please specify
Insurance Europe

Is your organization’s position on climate change consistent with theirs?
Consistent

Has your organization influenced, or is your organization attempting to influence their position?
We publicly promote their current position

State the trade association’s position on climate change, explain where your organization’s position differs, and how you are attempting to influence their position (if applicable)
The Dutch Association of Insurers (Verbond van Verzekeraars) is a member of Insurance Europe, and Aegon is an active member of the Dutch Association, through which we provide input into Insurance Europe’s responses to e.g. European
Commission consultations relating to sustainable finance (and other) legislation. The CEO of Aegon The Netherlands is also Vice-Chair of Insurance Europe’s Economic & Financial Affairs Committee (Ecofin), which helps steer the association’s engagement on sustainability-related policy initiatives.

Insurance Europe is the European insurance and reinsurance federation. Through its 37 member bodies — the national insurance associations — Insurance Europe represents all types of insurance and reinsurance undertakings, eg pan-European companies, monoliners, mutuals, and SMEs. The European (re)insurance industry identified climate change as an emerging risk over two decades ago and has since campaigned for more action to be taken to slow its advance and mitigate its many diverse impacts. As underwriters of risk and compensators of losses, (re)insurers are particularly aware of and sensitive to the threats posed by a changing climate. And as Europe’s largest institutional investors, (re)insurers can also play a significant role in financing the transition towards more sustainable economies. The industry is ready and willing to contribute to the EU’s ambitious green agenda. Measures are needed now to minimize future climate change-related losses and so ensure affordable and sustainable insurance cover in the years to come.

Funding figure your organization provided to this trade association in the reporting year, if applicable (currency as selected in C0.4) (optional)

Describe the aim of your organization’s funding

Have you evaluated whether your organization’s engagement with this trade association is aligned with the goals of the Paris Agreement?
   Yes, we have evaluated, and it is aligned

Trade association
   Other, please specify
   The European Financial Services Roundtable (EFR)

Is your organization’s position on climate change consistent with theirs?
   Consistent

Has your organization influenced, or is your organization attempting to influence their position?
   We publicly promote their current position

State the trade association’s position on climate change, explain where your organization’s position differs, and how you are attempting to influence their position (if applicable)
   The EFR is a round table organization of Chairmen and Chief Executives of Europe’s leading banks and insurance companies. The EFR is strongly supportive of the EU’s sustainable finance agenda and believes that the financial sector should be considered
Aegon frequently contributes to EFR positions on sustainable finance topics and Aegon subject-matter experts in e.g. responsible investment have participated in EFR engagements with policymakers.

**Funding figure your organization provided to this trade association in the reporting year, if applicable (currency as selected in C0.4) (optional)**

**Describe the aim of your organization’s funding**

**Have you evaluated whether your organization’s engagement with this trade association is aligned with the goals of the Paris Agreement?**

Yes, we have evaluated, and it is aligned

**Trade association**

Other, please specify

The Pan-European Insurance Forum (PEIF)

**Is your organization’s position on climate change consistent with theirs?**

Consistent

**Has your organization influenced, or is your organization attempting to influence their position?**

We publicly promote their current position

**State the trade association’s position on climate change, explain where your organization’s position differs, and how you are attempting to influence their position (if applicable)**

The Pan-European Insurance Forum (PEIF) is a forum for the CEOs of major European insurers (Aegon, Allianz, AVIVA, AXA, GENERALI, MAPFRE, Munich Re, RSA, Swiss Re, UNIQA and Zurich) to exchange and present views on policy and regulatory issues impacting the European insurance sector. Aegon is an active member of PEIF’s sustainable finance working group.

**Funding figure your organization provided to this trade association in the reporting year, if applicable (currency as selected in C0.4) (optional)**

**Describe the aim of your organization’s funding**
Have you evaluated whether your organization’s engagement with this trade association is aligned with the goals of the Paris Agreement?

Yes, we have evaluated, and it is aligned

C12.4

(C12.4) Have you published information about your organization’s response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

Exclusions from investment supporting Aegon’s membership of the Net-Zero Asset Owner Alliance (November 2021) and commitment to transition its General Account investments to Net Zero greenhouse gas emissions by 2050.

Comment
Aegon believes that governments, companies, and investors have a responsibility to facilitate a transition to a climate resilient, net-zero economy. Companies are expected to operate with the goal of enhancing energy efficiency, to invest in more environmentally friendly production techniques, and to contribute and adapt to the energy transition.

Aegon recognizes that poorly-diversified thermal coal producers, electricity generators, and oil & gas companies dependent on oil sands or Arctic extraction are most likely to be impacted by climate-related government regulation and therefore run the highest risk of their assets being stranded. These companies also contribute most to the GHG emissions that cause climate change, since coal and oil from oil sands are typically the most GHG-intensive fossil fuels. Therefore Aegon excludes from its investment universe:

- Companies that derive 25% or more of their revenue from the exploration, mining or refining of thermal coal. The proportion of revenue threshold will decline to 10% in 2027 and 5% in 2029;
- Companies that produce more than 20 million tons of thermal coal annually and are actively expanding exploration, mining or refining operations;
- Companies that derive 50% or more of their revenue from thermal coal-fired electricity generation;
- Companies that own coal-fired electricity generation capacity greater than 10 gigawatts and are actively expanding coal-fired electricity production capacity;
- Companies that derive 5% or more of their total oil equivalent production from oil sands;
- Companies building or operating pipelines that significantly facilitate export of oil extracted from oil sands;
- Companies that derive 5% or more of their revenue from oil and gas exploration and production in the Arctic.

Majority-owned subsidiaries of such companies are also excluded.

| Net Zero Asset Managers initiative | Net-Zero Asset Owner Alliance  
In November 2021, Aegon joined the Net-Zero Asset Owner Alliance, a UN-convened group of institutional investors committed to transitioning their portfolios to net-zero greenhouse gas emissions by 2050. For Aegon, this is a commitment to transition our EUR 156 billion general account investment portfolio and we have set a clear medium-term target. By 2025, Aegon aims to reduce by 25% the weighted average carbon intensity of its approximately EUR 55 billion corporate fixed income and listed equity general account assets where it has control. Aegon will set additional targets at 5-year intervals for the period after 2025 until 2050. To reach the 2025 target, Aegon will make adjustments to its general account portfolio.  
Aegon will regularly engage with those companies in its global investment portfolio that are the most carbon intensive in order to drive real-world reductions in greenhouse gas emissions. Aegon will regularly update its group-wide responsible investment exclusion criteria to reflect the latest scientific findings on climate change. |
| Net Zero Asset Owner Alliance |  
In November 2021, Aegon joined the Net-Zero Asset Owner Alliance, a UN-convened group of institutional investors committed to transitioning their portfolios to net-zero greenhouse gas emissions by 2050. For Aegon, this is a commitment to transition our EUR 156 billion general account investment portfolio and we have set a clear medium-term target. By 2025, Aegon aims to reduce by 25% the weighted average carbon intensity of its approximately EUR 55 billion corporate fixed income and listed equity general account assets where it has control. Aegon will set additional targets at 5-year intervals for the period after 2025 until 2050. To reach the 2025 target, Aegon will make adjustments to its general account portfolio.  
Aegon will regularly engage with those companies in its global investment portfolio that are the most carbon intensive in order to drive real-world reductions in greenhouse gas emissions. Aegon will regularly update its group-wide responsible investment exclusion criteria to reflect the latest scientific findings on climate change. |
| Principle for Responsible Investment (PRI) |  
Net Zero Asset Managers Initiative  
In November 2021, Aegon AM became a signatory to the Net Zero Asset Managers Initiative. By becoming a signatory, Aegon AM is committing to support the goal of net zero greenhouse gas emissions by 2050 or sooner, in line with global efforts to limit global warming to 1.5 degrees Celsius. Aegon AM also commits to support investing aligned with this net zero emissions target and work in partnership with its clients on decarbonization, supporting them with their own climate ambitions.  
To meet these commitments Aegon AM will look to increase the share of assets managed in-line with the attainment of net zero by 2050 or sooner – beginning with those managed on behalf of other Aegon Group companies following their own commitment to net zero. It will also prioritize reductions in the real economy by continuing its engagement program, using its influence with investee companies to encourage continued greenhouse gas measurement, targets and reduction. |
| UN Global Compact |  
Principles for Responsible Investment  
Aegon Asset Management is a signatory to the Principles for Responsible Investment, which sets out guidelines for how investors should take into account social, environmental and governance |
factors when making their investment decisions. When companies do not meet the standards outlined in our Responsible Investment Policy, we engage with them. For example, we were part of the PRI collaborative engagement on human rights and the extractive industry.

**UN Global Compact**

In November 2021, Aegon became a signatory to the UN Global Compact. We intend to advance the pact and its principles as part of the strategy, culture and day-to-day operations of our company, and to engage in collaborative projects which advance the broader development goals of the United Nations, particularly the Sustainable Development Goals. Going forward, you will find our Communication on Progress in both our Integrated Annual Report, as well as on the UN Global Compact’s website.

**UNEP-FI's Principles for Sustainable Insurance (PSI)**

Aegon is one of the founding signatories of the UNEP-FI's Principles for Sustainable Insurance. The aim of the PSI is to make sure sustainability becomes "business as usual". The PSI comprises four basic principles. Against each of these principles, we’ve set ourselves specific goals and targets.

### C14. Portfolio Impact

**C-FS14.0**

(C-FS14.0) For each portfolio activity, state the value of your financing and insurance of carbon-related assets in the reporting year.

**Lending to all carbon-related assets**

Are you able to report a value for the carbon-related assets?

No, and we do not plan to assess our portfolio’s exposure in the next two years

Primary reason for not providing a value for the financing and/or insurance to carbon-related assets

No relevant exposure in portfolio

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future

No relevant exposure in portfolio.

**Lending to coal**

Are you able to report a value for the carbon-related assets?

No, and we do not plan to assess our portfolio’s exposure in the next two years
Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
   No relevant exposure in portfolio

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
   No relevant exposure in portfolio.

Lending to oil and gas

Are you able to report a value for the carbon-related assets?
   No, and we do not plan to assess our portfolio’s exposure in the next two years

Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
   No relevant exposure in portfolio

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
   No relevant exposure in portfolio.

Investing in all carbon-related assets (Asset manager)

Are you able to report a value for the carbon-related assets?
   No, but we plan to assess our portfolio’s exposure in the next two years

Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
   Important, but not immediate priority

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
   May measure in the future depending on client / market interest

Investing in coal (Asset manager)

Are you able to report a value for the carbon-related assets?
   No, but we plan to assess our portfolio’s exposure in the next two years

Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
   Important, but not immediate priority

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
   May measure in the future depending on client / market interest

Investing in oil and gas (Asset manager)

Are you able to report a value for the carbon-related assets?
   No, but we plan to assess our portfolio’s exposure in the next two years
Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
   Important, but not immediate priority

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
   May measure in the future depending on client / market interest

**Investing all carbon-related assets (Asset owner)**

Are you able to report a value for the carbon-related assets?
   Yes

Value of the carbon-related assets in your portfolio (unit currency – as specified in C0.4)

Percentage of portfolio value comprised of carbon-related assets in reporting year
   6.7

**Investing in coal (Asset owner)**

Are you able to report a value for the carbon-related assets?
   Yes

Value of the carbon-related assets in your portfolio (unit currency – as specified in C0.4)

Percentage of portfolio value comprised of carbon-related assets in reporting year
   0.1

**Investing in oil and gas (Asset owner)**

Are you able to report a value for the carbon-related assets?
   Yes

Value of the carbon-related assets in your portfolio (unit currency – as specified in C0.4)

Percentage of portfolio value comprised of carbon-related assets in reporting year
   1.3

**Insuring all carbon-related assets**

Are you able to report a value for the carbon-related assets?
   No, and we do not plan to assess our portfolio’s exposure in the next two years
Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
No relevant exposure in portfolio

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
Aegon does not provide such services.

Insuring coal

Are you able to report a value for the carbon-related assets?
No, and we do not plan to assess our portfolio’s exposure in the next two years

Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
No relevant exposure in portfolio

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
Aegon does not provide such services.

Insuring oil and gas

Are you able to report a value for the carbon-related assets?
No, and we do not plan to assess our portfolio’s exposure in the next two years

Primary reason for not providing a value for the financing and/or insurance to carbon-related assets
No relevant exposure in portfolio

Please explain why you are not providing a value for the financing and/or insurance to carbon-related assets and your plans for the future
Aegon does not provide such services.

SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.
To enable our customers to calculate the greenhouse gas emissions associated with their supply chain / procurement spend, Aegon provides two metrics of our total operational (energy and travel-related) GHG emissions. For the 2021 reporting year:

- Location-based: 0.95 tonnes CO2e / EUR million revenue
- Market-based: 0.31 tonnes CO2e / EUR million revenue

The metrics are a function of Aegon’s operational GHG emissions in 2021 divided by the revenue from business operations (within scope for measurement of operational GHG emissions) for the same year (EUR 25,171 million). **Either of these metrics can be applied by our customers to determine the GHG emissions associated with their particular spend with Aegon** (i.e. the proportion of Aegon’s operational GHG emissions attributed by client).

For customers requiring additional granularity by emission scope, Aegon provides the following metrics:

- Scope 1: 0.22 tonnes CO2e / EUR million revenue
- Scope 2 (Location-based): 0.65 tonnes CO2e / EUR million revenue
- Scope 2 (Market-based): 0.01 tonnes CO2e / EUR million revenue
- Scope 3: 0.08 tonnes CO2e / EUR million revenue

Please note, as metrics of Aegon’s operational GHG emissions, these so not include Scope 3 GHG emissions associated with investments made on behalf of our clients.

To enable our customers to calculate the greenhouse gas emissions associated with their supply chain / procurement spend, Aegon provides two metrics of our total operational (energy and travel-related) GHG emissions. For the 2021 reporting year:

Location-based: 0.95 tonnes CO2e / EUR million revenue
Market-based: 0.31 tonnes CO2e / EUR million revenue

The metrics are a function of Aegon’s operational GHG emissions in 2021 divided by the revenue from business operations (within scope for measurement of operational GHG emissions) for the same year (EUR 25,171 million). Either of these metrics can be applied by our customers to determine the GHG emissions associated with their particular spend with Aegon (i.e. the proportion of Aegon’s operational GHG emissions attributed by client).

For customers requiring additional granularity by emission scope, Aegon provides the following metrics:

Scope 1: 0.22 tonnes CO2e / EUR million revenue
Scope 2 (Location-based): 0.65 tonnes CO2e / EUR million revenue
Scope 2 (Market-based): 0.01 tonnes CO2e / EUR million revenue
Scope 3: 0.08 tonnes CO2e / EUR million revenue
Please note, as metrics of Aegon's operational GHG emissions, these do not include Scope 3 GHG emissions associated with investments made on behalf of our clients.

Operational GHG emissions are based on the energy consumption and air travel activity of our four largest business units (Transamerica, Aegon the Netherlands, Aegon UK and Aegon Asset Management), which in 2021 comprised 81% of our global (direct employee) headcount. GHG emissions are calculated according to the ‘market’ and ‘location’ based methodologies of the GHG Protocol, on a country-level basis and using locally applicable emission conversion factors. For the market-based measurement we source conversion factors for electricity consumption from individual suppliers, 99% of which is zero carbon through our purchase of renewable electricity in the form of ‘green tariff’ supply contracts and renewable energy certificates (RECs). For the location-based approach, we source conversion factors for electricity consumption from the Environmental Protection Agency (eGRID) for the US, from the European Environment Agency for the Netherlands and from the Department for Environment, Food & Rural Affairs (Defra) for the UK. Under both approaches, we source conversion factors for gas consumption from Defra (100% mineral for the US, and 5% biofuel blend for the Netherlands and the UK). Conversion factors for air travel are sourced solely from Defra due to applicability for all countries. As part of the calculation of GHG emissions, the underlying activity data is extrapolated to cover unmeasured headcount.

Either of these metrics can be applied by our customers to determine the GHG emissions associated with their particular spend with Aegon (i.e. the proportion of Aegon's operational GHG emissions attributed by client).

For customers requiring additional granularity by emission scope, Aegon provides the following metrics:

Scope 1: 0.22 tonnes CO2e / EUR million revenue
Scope 2 (Location-based): 0.65 tonnes CO2e / EUR million revenue
Scope 2 (Market-based): 0.01 tonnes CO2e / EUR million revenue
Scope 3: 0.08 tonnes CO2e / EUR million revenue

Please note, as metrics of Aegon's operational GHG emissions, these so not include Scope 3 GHG emissions associated with investments made on behalf of our clients.

Operational GHG emissions are based on the energy consumption and air travel activity of our four largest business units (Transamerica, Aegon the Netherlands, Aegon UK and Aegon Asset Management), which in 2021 comprised 81% of our global (direct employee) headcount. GHG emissions are calculated according to the 'market' and 'location' based methodologies of the GHG Protocol, on a country-level basis and using locally applicable emission conversion factors. For the market-based measurement we source conversion factors for electricity consumption from individual suppliers, 99% of which is zero carbon through our purchase of renewable electricity in the form of 'green tariff' supply contracts and renewable energy certificates (RECs). For the location-based approach, we source conversion factors for electricity consumption from the Environmental Protection Agency (eGRID) for the US, from the European Environment...
Agency for the Netherlands and from the Department for Environment, Food & Rural Affairs (Defra) for the UK. Under both approaches, we source conversion factors for gas consumption from Defra (100% mineral for the US, and 5% biofuel blend for the Netherlands and the UK). Conversion factors for air travel are sourced solely from Defra due to applicability for all countries. As part of the calculation of GHG emissions, the underlying activity data is extrapolated to cover for unmeasured headcount.

To enable our customers to calculate the greenhouse gas emissions associated with their supply chain / procurement spend, Aegon provides two metrics of our total operational (energy and travel-related) GHG emissions. For the 2021 reporting year:
Location-based: 0.95 tonnes CO2e / EUR million revenue  
Market-based: 0.31 tonnes CO2e / EUR million revenue

The metrics are a function of Aegon's operational GHG emissions in 2021 divided by the revenue from business operations (within scope for measurement of operational GHG emissions) for the same year (EUR 25,171 million). Either of these metrics can be applied by our customers to determine the GHG emissions associated with their particular spend with Aegon (i.e. the proportion of Aegon's operational GHG emissions attributed by client).

For customers requiring additional granularity by emission scope, Aegon provides the following metrics:

Scope 1: 0.22 tonnes CO2e / EUR million revenue  
Scope 2 (Location-based): 0.65 tonnes CO2e / EUR million revenue  
Scope 2 (Market-based): 0.01 tonnes CO2e / EUR million revenue  
Scope 3: 0.08 tonnes CO2e / EUR million revenue

Please note, as metrics of Aegon's operational GHG emissions, these so not include Scope 3 GHG emissions associated with investments made on behalf of our clients.

Operational GHG emissions are based on the energy consumption and air travel activity of our four largest business units (Transamerica, Aegon the Netherlands, Aegon UK and Aegon Asset Management), which in 2021 comprised 81% of our global (direct employee) headcount. GHG emissions are calculated according to the ‘market’ and ‘location’ based methodologies of the GHG Protocol, on a country-level basis and using locally applicable emission conversion factors. For the market-based measurement we source conversion factors for electricity consumption from individual suppliers, 99% of which is zero carbon through our purchase of renewable electricity in the form of ‘green tariff’ supply contracts and renewable energy certificates (RECs). For the location-based approach, we source conversion factors for electricity consumption from the Environmental Protection Agency (eGRID) for the US, from the European Environment Agency for the Netherlands and from the Department for Environment, Food & Rural Affairs (Defra) for the UK. Under both approaches, we source conversion factors for gas consumption from Defra (100% mineral for the US, and 5% biofuel blend for the Netherlands and the UK). Conversion factors for air travel are sourced solely from Defra due to applicability for all countries. As part of the calculation of GHG emissions, the underlying activity data is extrapolated to cover for unmeasured headcount.

Sustainability and ESG-integration more generally is recognized as a key thematic topic by Aegon through our Business Environment Scan. Sustainability is increasingly a key value driver for companies. In 2020 and 2021, we took significant steps to strengthen our sustainability approach. We established a Global Sustainability Board, which is supported by our Global Corporate Sustainability Team. Our focus remains on strengthening our governance and enhancing the quality of our reporting processes. Furthermore, we are improving our engagement on sustainability-related topics both internally and externally.

Provide the rationale for implementing this process to assess your portfolio’s exposure to forests- and/or water-related risks and opportunities

Biodiversity is included in the Responsible Investment Policy of Aegon NV. Aegon sees several risks which could threaten biodiversity, including (but not limited to):

- Pollution: Water, waste and land pollution, including from plastics and other toxins;
- Land use and over exploitation: Deforestation, increasing intensification of agriculture and negative business impacts on regions with water-scarcity issues;
- Ocean use and over exploitation (i.e. overfishing); and
- Loss of natural habitats (both natural wildlife and individual

Afore mentioned topics as, in some cases, included in related investment policies of Aegon Asset Management - the Group's asset manager - or other operating companies, incorporated in the Aegon Group.

The Aegon AM NL Sustainability Risks and Impacts Policy expects companies to consider the following re. forestry and agriculture:

- Companies should act to prevent deforestation (e.g. by planting new forests when clearing existing forests) and
- Protect natural forests (including old growth forests, bogs, mangroves, peatlands and
rainforests) as captured in the High Conservation Value (HCV) concept.

- Companies throughout the wood supply chain should work to prevent the usage of illegally cut and traded timber and only use timber in their operations that has been certified in accordance with the criteria of the Forest Stewardship Council (FSC).
- Production chains of timber traders and companies involved in the wood product chain (including pulp, paper, veneer, and furniture producers) should be certified according to the FSC Chain of Custody criteria.
- Forest construction companies should identify and protect High Conservation Value (HCV) areas within the forests they manage and identify and protect High Carbon Stock (HCS) forests.
- Agriculture companies should prevent the burning of naturally occurring ecosystems (e.g. forests and savanna) for the purpose of land clearing to establish large-scale agricultural plantations.
- Agricultural companies should have ‘No Deforestation, No Peat, No Exploitation’ (NDPE) policies in place.
- Agriculture companies should make use of pesticides in a sustainable manner.

In addition and in some cases, a negative screen is used to exclude companies that do not meet threshold criteria re., for example, foresty management or those who are active in palm oil. Also, Aegon Asset Management conducts a periodic screening of all portfolios - and all included investee companies irrespective of any industry - subject to the various policies for both compliance and any controversies or adverse impact. For biodiversity-related screening, this includes the supply chain of investee companies. Aegon Asset Management will engage with those companies that are identified in the aforementioned process. Aegon may also use its shareholder rights in to stimulate compliance with its policies.

Page/Section reference
P381 Biodiversity was the International Responsible Business Conduct (IRBC) annual theme for 2021, Aegon AM actively participated in a series of dedicated collaborative engagements and in drafting a thematic framework. The framework brings together relevant information, international legislation and regulations, tips, and other support that insurers can use in relation to biodiversity. The engagements were geared toward reducing deforestation risks and providing relevant input and learnings.

Response to forests- and/or water-related risks and opportunities

Comment
In 2018, Aegon stated its intent to support the spirit and objectives of the Dutch International Responsible Business Conduct Agreement in the insurance sector (also known as ‘the covenant’). With biodiversity being the IRBC’s annual theme for 2021, Aegon AM actively participated in a series of dedicated collaborative engagements and in drafting a thematic framework. The framework brings together relevant information, international legislation and regulations, tips, and other support that insurers can use in relation to biodiversity. The engagements were geared toward reducing deforestation risks and providing relevant input and learnings. Together with signatories of the covenant including NGOs, Aegon AM supported engagement efforts with three major listed food companies processing, amongst others, meat and dairy products. With soy often being used as feed for cattle and with tropical forests in parts of Brazil being cleared for both soy production and use as pasture for grazing cattle, the selected companies were considered to be at risk of contributing to deforestation via their supply chain. Engagement focused on supply chain oversight regarding deforestation, sustainable use of soy, alternative sourcing, and the use of viable alternative protein sources. This included locally-sourced animal feed, nature-inclusive farming, and considerations on a different protein product selection, such as plant-based products.
