Aegon delivers strong Q4 2014 Results

Alex Wynaendts
CEO

Darryl Button
CFO

The Hague – February 19, 2015
Continued successful execution of our strategy

**Optimize portfolio**
- Divested non-core businesses: Canada, France, Badajoz JV
- Expanding distribution through JVs with strong local partners
  - Santander (Portugal)
  - La Banque Postale (France)
  - BANCOOB (Brazil)

**Operational excellence**
- Improved customer retention in the US following creation of I&R
- Cost savings reinvested to improve customer experience
- Successful launch of new products, including third-party Dutch Mortgage Fund

**Customer loyalty**
- Knab reaches EUR 1 billion AuM and 50,000 customers
- Largest DC provider in the Netherlands (in terms of AuM)
- Auto-upgrade of customers onto platform started (UK)
- Highest net promoter score for US pension providers (> $1b)
Higher earnings and sales driven by strong operational performance

- Higher underlying earnings supported by continued solid business performance
- Sales growth across the group; new business profitability strong despite low interest rates
- Strong operational free cash flows and solid capital position
- Final dividend increased to EUR 0.12 per share

<table>

</tr>
</tbody>
</table>

*Earnings = underlying earnings before tax; Cash flows = operational free cash flows excluding market impact and one-time items
22% sales growth driven by continued strong deposits

- Strong gross deposits of EUR 13.7 billion driven by US variable annuities and pensions, and third-party asset management flows; net deposits* of EUR 2.6 billion
- Higher life sales mainly due to stronger universal life production in US and Asia; product offering and pricing updated to reflect low interest rates
- Accident & health and general insurance sales exceed EUR 1 billion driven mainly by successful distribution expansion in US

* Excluding run-off businesses and stable value solutions
Note: Total sales consists of new life sales plus 1/10th of gross deposits plus new premiums for accident & health and general insurance
Growth of fee-based businesses continues

- Americas gross deposits of USD 9.7 billion result of continued growth of fee business
  - Variable annuity deposits up 23% to USD 2.8 billion; net deposits of USD 1.7 billion
  - Retirement plan deposits of USD 5.3 billion; net deposits of USD 0.6 billion
  - Record mutual fund gross deposits of USD 1.5 billion; net deposits of USD 0.2 billion
- Gross deposits in NL more than double to EUR 1.0 billion due to successful Knab proposition
- Aegon Asset Management 3rd party deposits up 58% due to higher sales in the UK
- UK platform assets double in 2014, reaching GBP 2.7 billion due to continued strong deposits
Capital position remains solid as focus turns fully towards Solvency II

- Group IGD solvency ratio of 208% and solid local capital positions
- Holding excess capital of EUR 1.2 billion following EUR 500 million senior debt redemption
- European operations fully focused on Solvency II implementation
- Solvency II uncertainties remain
  - Internal model approval process
  - Standard formula specifications
  - Equivalence approval process
- Calibration of deduction & aggregation, usage of volatility adjuster and scope of matching adjustment remain unclear

</tbody>
</table>
Leverage and fixed charge coverage targets achieved in 2014

- Gross financial leverage of 28.7% within 26-30% target range
  - Leverage cut by ~25% since 2011
  - No equity credit taken for perpetual capital securities

- Fixed charge coverage of 6.5x within 6-8x target range
  - Fixed charges reduced by more than 40%
  - Preferred dividend eliminated
  - Positioning capital structure for Solvency II and taking advantage of low interest rates through proactive refinancing

Note: Gross leverage and fixed charge coverage ratios as reported
Sustainable dividend growth

- Proposed final 2014 dividend of EUR 0.12 per share, total 2014 dividend of EUR 0.23 per share
- Continue to neutralize stock dividends to avoid dilution
- Future dividend growth dependent on strong capital position and cash flows

**Free cash flows**

**Increasing dividends**

- Final 2011 dividend of EUR 0.10 per share annualized for comparative purposes
- Dividend per share represents interim and final dividend declared over the year; cash represents amount spent during fiscal year

*Final 2011 dividend of EUR 0.10 per share annualized for comparative purposes

**Dividend per share represents interim and final dividend declared over the year; cash represents amount spent during fiscal year*
Key messages

Q4 results
- Higher earnings and profitable sales despite continued low interest rates
- Continued sales momentum throughout group reflects strong fundamentals
- Strong normalized operational free cash flows

Capital and risk management
- Dividend increased to EUR 0.23 per share supported by cash flows
- Capital position remains solid
- Solvency II implementation key priority for 2015

Execution of strategy
- Sale of Canadian operations and stake in La Mondiale
- Strategic asset management partnership in France with La Banque Postale
- Expansion of distribution in Brazil through joint venture with BANCOOB
Q4 2014 results continued

Helping people take responsibility for their financial future
## Sustainability ingrained in our strategy

### Products and services customers can trust
- Clear and easy to understand products
- Value to the customer taken into account at every step of the product design process
- Market conduct principles focus on meeting customers’ needs

### A responsible approach to investments
- Decisions guided by Aegon’s Responsible Investment Policy
- Clear standards in areas such as child labor, the environment and corruption
- Using our influence to promote sustainability governance and economic development

### Supporting local communities
- Long history of working with and investing in local communities
- Volunteering programs encourage employees to take paid time off to work on local initiatives
- Supporting local charities and good causes worldwide

### Aegon’s approach to sustainability recognized externally

  - 2013: 8.6
  - 2014: 7.8

**Fee-based earnings**
- (% of UEBT)
  - 2011: 30%
  - 2012: 33%
  - 2013: 33%
  - 2014: 39%

Note: 2011 and 2012 return on equity as reported
Underlying earnings of EUR 562 million

- Americas earnings higher driven mostly by growth in variable annuities and pensions due to markets and net inflows
- Higher earnings in the Netherlands due to a EUR 45 million benefit resulting from a new employee pension arrangement
- Increase in UK earnings mainly driven by improved persistency in the pension business
- Lower earnings from New Markets as growth from Aegon Asset Management is more than offset by the impact of product changes in Poland, the recurring effect of assumption changes and model updates in Asia, and the derecognition of France

Net income of EUR 399 million

- Fair value items mainly reflect hedging programs without an accounting match in the US and NL; alternative asset returns impacted by under performance of energy sector exposure
- Gains on investments primarily related to the rebalancing of the fixed income portfolio in anticipation of Solvency II in NL and the UK, and the divestment of a private equity investment in the NL
- Higher net impairments as a result of lower recoveries on previously impaired structured securities
- Other charges primarily due to a charge for the Optas agreement in NL, implementation of the pension fee cap in UK and the modification of unit-linked policies in Poland

*Except for changes in own credit spread and other non-hedged items*
Strong variable annuity and mutual fund deposits in the Americas more than offset lower deposits from pensions due to fewer take-overs

Higher gross deposits in the Netherlands driven by strong performance from online bank Knab and increased PPI deposits

Continued strong platform deposits in the UK support growth and business transformation

Higher gross deposits in New Markets driven by strong growth in Aegon Asset Management deposits in the UK

Gross deposits of EUR 13.7 billion
Higher new life sales in the Americas mainly driven by strong universal life sales
Lower new life sales in the Netherlands the result of signing fewer, but more profitable, pension contracts
Decrease in UK new life sales mainly caused by the decline in traditional pension sales
32% higher new life sales in New Markets driven by expanded distribution in CEE and Asia
Lower MCVNB in the Americas as the impact of lower interest rates more than offset the benefit of higher sales

MCVNB decline in the Netherlands driven by lower contribution from mortgages resulting from a higher allocation of production to third party investors

Lower MCVNB in the UK as a result of lower margins due to auto-enrollment and lower margins and volumes on annuities

Higher MCVNB in New Markets as higher sales and the inclusion of the joint venture with Santander more than offset lower margins in CEE

**Market consistent value of new business**

5.1 3.0 2.7 2.1 2.0 1.9

* IFRS equity, excluding revaluation reserves
Earnings growth driven by higher variable annuity and pension balances due to positive markets and net inflows

Operating expenses at similar level while growing the business

Higher life and A&H sales driven by indexed and secondary guarantee universal life production, and higher supplemental health sales related to Affordable Care Act

Gross deposits increased to USD 9.7 billion as a result of continued solid deposits in pensions and growth in variable annuities and mutual funds

MCVNB declined to USD 165 million as the impact of lower interest rates more than offset higher sales
The Netherlands

- Higher earnings driven by a EUR 45 million release resulting from a new employee pension arrangement
- Lower operating expenses mainly driven by a new employee pension arrangement
- New life sales decline driven the result of signing fewer, but more profitable, pension contracts
- Gross deposit growth mainly driven by strong performance from online bank Knab and higher PPI deposits
- MCVNB declined to EUR 40 million as the benefit of more profitable new pension sales was more than offset by lower sales and a greater allocation of mortgages production to third party investors
United Kingdom

- Underlying earnings up 37% to GBP 22 million due to improved persistency
- Higher operating expenses mainly due to GBP 26 million cost for the implementation of the pension fee cap
- Lower new life sales mainly due to a decline in traditional pension sales
- Strong platform deposits support continued growth and transformation of the business
- MCVNB of GBP (5) million driven by lower margins due to auto-enrollment and lower margins and volumes on annuities
New Markets

- Lower earnings as growth in Asset Management more than offset by higher surrenders in Poland, the recurring effect of assumption changes and model updates in Asia and the derecognition of France.
- Higher operating expenses due mostly to currencies and increased project spending.
- Growth in new life sales mainly driven by higher sales of universal life products in Asia.
- Gross deposits up 53% due mostly to higher asset management deposits in the UK.
- MCVNB higher by 34% to EUR 29 million as the inclusion of the joint venture with Santander more than offset lower margins in CEE.

% of US general account: 6.5%

Amounts are fair value per December 31, 2014; 108.5% fair value to amortized cost for corporate bonds.
Main economic assumptions

Main US economic assumptions

- 10-year US Treasury assumed to grade to 4.25% by 2024
- 3-month US Treasury assumed to grade to 2.5% by 2024
- Credit spreads are assumed to grade to 110 bps by 2016
- Bond funds are assumed to return 4% until 2024 and 6% thereafter
- Annual gross equity market returns of 8% (price appreciation + dividends)

Earnings sensitivities to equity markets and reinvestment yields

- Protection of capital position main purpose of macro hedging program

- IFRS accounting mismatch between hedges and liabilities
  - GMIB liability carried at amortized cost (SOP 03-1)
  - Macro hedge carried at fair value

- Limited reinvestment risk moderates impact of low US interest rates on underlying earnings
  - Assets and liabilities closely matched
  - ~5% of general account assets reinvested per annum as a result of declining spread balances

Cautionary note regarding non-IFRS measures
This document includes the following non-IFRS financial measures: underlying earnings before tax, income tax, income before tax and market consistent value of new business. These non-IFRS measures are calculated by consolidating on a proportionate basis Aegon’s joint ventures and associated companies. The reconciliation of these measures, except for market consistent value of new business, to the most comparable IFRS measure is provided in note 3 “Segment information” of Aegon’s Condensed Consolidated Interim Financial Statements. Market consistent value of new business is not based on IFRS, which are used to report Aegon’s primary financial statements and should not be viewed as a substitute for IFRS financial measures. Aegon may define and calculate market consistent value of new business differently than other companies. Aegon believes that these non-IFRS measures, together with the IFRS information, provide meaningful information about the underlying operating results of Aegon’s business including insight into the financial measures that senior management uses in managing the business. In addition, return on equity is a ratio using a non-GAAP measure and is calculated by dividing the net underlying earnings after cost of leverage by the average shareholders’ equity excluding the preferred shares, the revaluation reserve and the reserves related to defined benefit plans.

Local currencies and constant currency exchange rates
This document contains certain information about Aegon’s results, financial condition and revenue generating investments presented in USD for the Americas and GBP for the United Kingdom, because those businesses operate and are managed primarily in those currencies. Certain comparative information presented on a constant currency basis eliminates the effects of changes in currency exchange rates. None of this information is a substitute for or superior to financial information about Aegon presented in EUR, which is the currency of Aegon’s primary financial statements.

Forward-looking statements
The statements contained in this document that are not historical facts are forward-looking statements as defined in the US Private Securities Litigation Reform Act of 1995. The following are words that identify such forward-looking statements: aim, believe, estimate, target, intend, may, expect, anticipate, project, counting on, plan, continue, want, forecast, goad, should, would, is confident, will, as well as other similar expressions as they relate to Aegon. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Aegon undertakes no obligation to publicly update or revise any forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, which merely reflect company expectations at the time of writing. Actual results may differ materially from expectations conveyed in forward-looking statements due to changes caused by various risks and uncertainties. Such risks and uncertainties include but are not limited to the following:

- Changes in general economic conditions, particularly in the United States, the Netherlands and the United Kingdom;
- Changes in the performance of financial markets, including emerging markets, such as with regard to:
  - The frequency and severity of defaults by issuers in Aegon’s fixed income investment portfolios;
  - The effects of corporate bankruptcies and/or accounting restatements on the financial markets and the resulting decline in the value of equity and debt securities Aegon holds; and
  - The effects of declining creditworthiness of certain private sector securities and the resulting decline in the value of sovereign exposure that Aegon holds;
- Changes in the performance of Aegon’s investment portfolio and decline in ratings of Aegon’s counterparties;
- Consequences of a potential (partial) break-up of the euro;
- The frequency and severity of insured loss events;
- Changes affecting longevity, mortality, morbidity, persistence and other factors that may impact the profitability of Aegon’s insurance products;
- Reinsurers to whom Aegon has ceded significant underwriting risks may fail to meet their obligations;
- Changes affecting interest rate levels and continuing low or rapidly changing interest rate levels;
- Changes affecting currency exchange rates, in particular the EUR/USD and EUR/GBP exchange rates;
- Changes in the availability of, and costs associated with, liquidity sources such as bank and capital markets funding, as well as conditions in the credit markets in general such as changes in borrower and counterparty creditworthiness;
- Changes in laws and regulations, particularly those affecting Aegon’s operations, ability to hire and retain key personnel, the products Aegon sells, and the attractiveness of certain products to its consumers;
- Regulatory changes relating to the insurance industry in the jurisdictions in which Aegon operates;
- Changes in customer behavior and public opinion in general related to, among other things, the type of products also Aegon sells, including legal, regulatory or commercial necessity to meet changing customer expectations;
- Acts of God, acts of terrorism, acts of war and pandemics;
- Changes in the policies of central banks and/or governments;
- Lowering of one or more of Aegon’s debt ratings issued by recognized rating organizations and the adverse impact such action may have on Aegon’s ability to raise capital and on its liquidity and financial condition;
- Lowering of one or more of insurer financial strength ratings of Aegon’s insurance subsidiaries and the adverse impact such action may have on the premium writings, policy retention, profitability and liquidity of its insurance subsidiaries;
- The effect of the European Union’s Solvency II requirements and other regulations in other jurisdictions affecting the capital Aegon is required to maintain;
- Litigation or regulatory action that could require Aegon to pay significant damages or change the way Aegon does business;
- As Aegon’s operations support complex transactions and are highly dependent on the proper functioning of information technology, a computer system failure or security breach may disrupt Aegon’s business, damage its reputation and adversely affect its results of operations, financial condition and cash flow;
- Customer responsiveness to both new products and distribution channels;
- Competitive, legal, regulatory, or tax changes that affect profitability, the distribution cost of or demand for Aegon’s products;
- Changes in accounting regulations and policies or a change by Aegon in applying such regulations and policies, voluntarily or otherwise, may affect Aegon’s reported results and shareholders’ equity;
- The impact of acquisitions and divestitures, restructuring, product withdrawals and other unusual items, including Aegon’s ability to integrate acquisitions and to obtain the anticipated results and synergies from acquisitions;
- Catastrophic events, either manmade or by nature, could result in material losses and significantly interrupt Aegon’s business; and
- Aegon’s failure to achieve anticipated levels of earnings or operational efficiencies as well as other cost saving and excess capital and leverage ratio management initiatives.

Further details of potential risks and uncertainties affecting Aegon are described in its filings with the Netherlands Financial Markets and the US Securities and Exchange Commission, including the Annual Report. These forward-looking statements speak only as of the date of this document. Except as required by any applicable law or regulation, Aegon expressly disclaims any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in Aegon’s expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.
